ESTIONS OF THE WEEK

Editor's note: Here are the ons asked most frequently ng the past week, as reported ty agricultural agents, Ab- ., by staff members of ... U.S. Agricultural Extension ... and we Experiment Sta-

How can I control the Asiatic weevil on tobacco?
This insect does not actually the tobacco plant, so don't about it.

How can I control pine beetles on trees?
Sprays applied in the spring ...ve the problem. Use arse- of lead, 3-5 DDT, or hepta-

Why do tomatoes fail to ri- ? They have grown to a normal ... they stay green.
Not much is known about the ... of this trouble. Be patient, will probably ripen.

Which crop is better - crim- ver or vetch — for winter ... by turned for corn?
Either crop is good for green ... If you use crimson clov- ure to seed early enough ... become established before ...weather.

When is the best time to har- ed clover seed.
Cut for seed when most of ... pods are in the mature seed ... A well-filled, head, when rub- ... the palm of the hand, should ... to 10 seeds. Some of the ... should have begun to show a ... color.

Why do dogs refuse to ea- barley? Also, why, if they do ... it sometimes makes them ill. ...this?
The dogs may be slow in ...g from one feed to another ... they will eat the barley ... them at it gradually, and be ...ful that the hungry ones not con- ...more than 10 per cent of ...tion, or you may have trouble ...vomiting, etc.

Colored Dots

Mrs. Zozie Wells, the cousin of Mary Marshall, has returned home in Columbus, Ohio, af- ...pending her vacation in the ...me of the Rev. and Mrs. C. A. ...ell. She was also a house ...st of Deacon and Mrs. Charlie ...son.

An unusually large crowd at- ...ded the annual home coming and ...ket at the Promise Land Baptist ...rch last Sunday at the 11:30 ... and 3 P. M. services. The Rev. R. Q. Lawing, pastor of the church, de- livered the morning sermon, and special music was rendered by the senior choir of the Mount Shiloh Baptist Church. The 3 P. M. serv- ice was conducted by the Rev. T. A. Sandifer, pastor of the Jordan Baptist Church and his choir, un- der the direction of Mrs. Mattie T. West. Dinner was served by the ladies of the church. The total offer- ing for the day was $275.00. The Rev. Louis Jones, pastor of the River View Baptist Church, of Charleston, West Va., is the guest speaker for the week.

A successful revival was report- ed at the Mount Zion Baptist Church last week. The Rev. R. Q. Lawing was the guest speaker for the week. Nine additions were made to the church. Music throughout the week was rendered by the home choir, under the direction of Mrs. West. The Peaceful Grove choir assisted in the music on Wednesday evening.

A successful revival was reported at the Springfield Baptist Church last week. The Rev. James Frank- lin was the guest minister through- out the week.

The public is cordially invited to attend the ordination services for the following men of the Zion Bap- tist Church this Sunday at 3 P. M., Messers. James Franklin, Sr., and Frank Johnson.

The Rev. R. Q. Lawing and the Promise Land Baptist Church choir will be the special guests at the Mercy Seat Baptist Church on the 4th Sunday at 2:30, for the anni- versary of the Rev. A. J. Sherrid and church.

Impressive home coming service was held at First Baptist Church last Sunday. The pastor of the church delivered a special home- coming message. Dinner was served at the close of the morning service. The afternoon service began at 3 P. M., with a special sermon by Rev. Pride, of Lynchburg, and special music by the Rugged Cross Singers. Preaching is held each eve- ning at 8 P. M.

Deacon Calvin Elliott, of the Mount Shiloh Baptist Church, of Spout Spring, is in the Lynchburg General Hospital.

Mr. Herbert Allen is undergoing special treatment in the McGuire Hospital in Richmond.

Mr. William Hunter is in the Lynchburg General Hospital.

T. W. A. reports record profit for June.

Farm News

J. A. Smith, County Agent

Planting barley this year? Plant in between September 15 and Oc- tober 10 for best results. Barley seems to be more susceptible than the other small grains to soil acidi- ty. North Carolina workers report that in some demonstrations with a pH of 5.5, barley showed poor growth, while good growth was seen with 6.3 pH with the same fertilizer treatment. Soil test is the best measuring device. Davie bar- ley has given excellent results at the Charlotte Station — seed will be scarce this year — early order- ing will help you in securing enough to check under your farm condi- tions.

One of the major cigarette com- panies says that they found some bands of tobacco were tied with rubber bands last season. This is a poor practice in that the manu- facturers do not have equipment that will remove this type of band.

1600 calves have been consigned to the first feeder sale, 1000 to the second sale. Those who have not consigned should do so at once. The Lynchburg Sale has been growing at the rate of 10% per year. Six farmers from Appomattox are con- signing this year for the first time.

Weevil Control Suggestions

Two procedures for controlling the alfalfa weevil on newly seeded alfalfa with heptachlor can be us- ed, says J. A. Smith, county agent.

The procedures are as follows:

1. Granular heptachlor — The entire amount of fertilizer with bo- rax (containing NO heptachlor) may be put down at the time of planting in the usual manner. Af- ter the stand is up and established —about October 1, but not later than October 15, use 2½% granu- lar heptachlor at the rate of 30 to 40 pounds per acre. The method of spreading the granules will depend on the equipment available. Use an accurately calibrated fertilizer dis- tributor or a cyclone seeded ad- justed to apply the correct amount.

2. Heptachlor - Fertilizer Mix- ture. If you want to use the hepta- chlor - fertilizer mixture, you ap- ply about one-half to two-thirds of the amount of fertilizer (contain- ing NO heptachlor) normally used at seeding time. This is to assure a good stand. About October 1, but not later than October 15, top- dress with 800 - 1000 pounds of 0-10-20, 0-9-27, or 0-14-14, with heptachlor, or 500 pounds of 0-18- 36 or 0-25-25 containing hepta- chlor.

It is essential that the correct amount of heptachlor be applied per acre in either case. It is just as important to avoid using too much heptachlor as it is to use e- nough to obtain control of the weevil. Be sure that you use equip- ment that is calibrated accurately, and to apply within the specified time, Smith advises.

ADDRESS OF MR. CLARK AT DEDICATION OF NEW LOCAL POST OFFICE

Hon. M. L. Clarke, the Regional Operations Director of the Washing- ton Region, Post Office Department, was the principal speaker at the dedication of the new U. S. Post Office Facility here last Saturday. The following is a summary of his remarks:

"I bring you the personal greet- ings and congratulations of Post- master General Arthur E. Sum- merfield in Washington, who is de- termined to search for the means and to put into operation the meth- ods assuring each citizen maximum postal service on an efficient and economical basis.

"This new postal facility will play a vital role in achieving the United States Post Office Department's goal of next-day delivery of to- day's mail anywhere in the nation.

"Last year, Americans mailed 63 billion pieces of letter mail and over one billion parcels. Combined, these figures represent two-thirds of all the world's mail and repres- ent an increase in volume of 120 per cent in 20 years.

"To keep ahead of this continu- ing growth, a gigantic overhauling of postal facilities was initiated by Postmaster General Summerfield. This tremendous modernization program, reaching into every sec- tion of the land, will "rocket to new heights" this year.

"In the massive overhauling are provisions for mechanizing the handling and distribution of mail in the so-called "gateway" post of- fices. "The World's Most Mechaniz- ed Post Office" in Washington, D. C. — a fore-runner of many more to come — is the result of six years of research and development work and installation of automatic electronic equipment now in daily use in the Post Office of the Na- tion's Capitol.

"Still another "breakthrough" in mail handling is the "metro-mail" coordinated delivery program, pro- viding 168 million people in 81 postal metropolitan areas with next- day delivery for all first-class mail deposited before 5:00 P. M. Ninety per cent of the nation's 35,000 post offices are within the areas benefiting from this plan.

"During the past year, city de- livery services were established in 110 communities for the first time, benefitting 97,846 families and 7,- 571 business firms. In areas where such services were already estab- lished, they were extended to bene- fit another 1,240,985 families and 62,052 business firms. Rural deliv- ery service was extended to bene- fit 197,811 additional families.

"Your new Post Office is one of approximately 4,500 built by pri- vate enterprise and leased to the Department under the unique com- mercial leasing program initiated by Mr. Summerfield. Twelve thou- sand more of the nation's 35,000 Post Offices must be replaced be- cause of obsolescence and deterio- ration, in order to make nation's Postal service fully adequate to meet the future postal requirements of its citizens."
